## Hepatitis C: Test, Treat, Cure

Did you know that Veterans are more likely to have hepatitis C? The good news is that new treatments for hepatitis C are available at VA and are able to cure most people in about 12 weeks. VA has treated more than 80,000 patients with hepatitis C since new medications for hepatitis C treatment became available. Hepatitis C can be damaging your liver if left untreated and can lead to cancer in some people. Get tested. [Learn more.](#)

## Veterans at Higher Risk: Postpartum Depression

The birth of a baby is a life changing event that can trigger all kinds of emotions from happiness and joy to jitters and fear. It can also lead to something you might not expect —postpartum depression. Women Veterans commonly suffer from depression, anxiety, and post-traumatic stress disorder after military service. With more women serving in the military than ever before, it

is important to support women Veterans by providing information and treatment options. [Learn more.](#)
